

PICK ONE (kitselman)

16 years of trying to fix this broken thing
I've never said an unkind word to you
If you can't forgive me then admit it and let's move on
Because I've got to forgive myself

*If there's one thing I've learned from these years
It's that Anger's going to rip your heart to shreds
If that's the way that you speak to me now
Then we're going to have to turn this thing around*

Pick one- Pick come on in or walk away

You owe us both an honest choice

Pick one- you can leave or you can stay

But there will always be a place for you in this old man's heart

Our past is done and we couldn't change it if we tried
I've lived regret for thirty years now
But from the second I first met you and played you that song
I've tried every way I know to reach out to you

*If there's one thing I've learned from these years
It's that Anger's going to rip your heart to shreds
If that's the way that you speak to me now
Then we're going to have to turn this thing around*

CHORUS

Facebook politics have got nothing to do with us
And I'm sorry if you don't like the way I think
That can't be the source of all this anger you have
You've got to find out where it lives
You must find out where it lives

CHORUS
